

FAST LOCALIZER

THE ULTIMATE LOCALIZATION PLUGIN

Where can I obtain a ChatGPT API Key?

To obtain a ChatGPT API key, you must first create an account on the OpenAI platform by visiting the following URL: <https://platform.openai.com>.

Once your account is set up, navigate to the API Keys section at <https://platform.openai.com/api-keys> to generate a new key.

The key you generate will be the key you use for the Fast Localizer Importer.

How much does it cost to translate with ChatGPT?

The cost of translating with ChatGPT depends on the usage and the specific model you choose to use. OpenAI offers different models with varying levels of performance and pricing.

As of the latest pricing structure:

- **GPT-4:** Costs \$0.03 per 1,000 tokens for prompts (input) and \$0.06 per 1,000 tokens for completions (output) when using the GPT-4-8K model.
- **GPT-3.5:** Costs \$0.0015 per 1,000 tokens for prompts and \$0.002 per 1,000 tokens for completions.

Tokens can be thought of as pieces of words, with 1,000 tokens being roughly equivalent to 750 words. The actual cost of a translation task will depend on the length and complexity of the text being translated.

For more detailed and up-to-date pricing, please visit the official OpenAI pricing page: <https://openai.com/pricing>.

How much does it cost to translate with Google Translate API?

The cost of using the Google Translate API is based on the number of characters you translate. The pricing model is straightforward:

- **Google Translate API:** \$20 per 1 million characters translated.

There are no additional charges or fees beyond the character-based pricing. The cost will scale depending on the length and volume of the text you need to translate.

For detailed and up-to-date pricing information, please visit the Google Cloud pricing page:
